Optical Total Solutions for Accelerating Your Innovation

About the Event

LightTools and **CODE V** are optical design software which can produce accurate analysis and excellent simulation results that help you to boost your productivities, facilitate your innovate ideas, increase product performance, lower product costs, and enable your product faster time to market. They are proven the trusted illumination and optical design tools of numerous companies, government agencies, research labs, and universities worldwide. In this event, we'll provide a comprehensive introduction of LightTools and CODE V software solutions in illumination and lens design, and also the modern optical application of both tools including backlight and HUD case studies. You will also have the chance to try CODE V & LightTools on your own!

This event is **free of charge** and brought to you by CYBERNET SYSTEMS TAIWAN, COLE and OPSS.

Seminar

31-May-2016, Fusion@MAE (Block N3.1-B3c-06), Nanyang Technological University

Time	Topic
10:00-10:30	Check in
10:30-10:40	Opening
10:40-11:10	Optics and Photonics in Singapore
11:10-11:20	Break
11:20-12:00	Optical Total Solutions for Accelerating Your Innovation
12:00-13:00	Lunch
13:00-13:40	Illumination Design Solution
13:40-13:50	Break
13:50-14:30	CODE V for Camera Lens Design
14:30-14:50	Tea Break
14:50-15:30	Case Study: Backlight Design
15:30-15:40	Break
15:40-16:20	Case Study: Automotive HUD Case Study

Workshop

01-June-2016, CAE Lab 1(Block N3-B3b-05), Nanyang Technological University

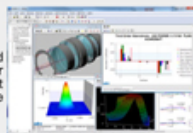

Time	Topic	Content
09:10-09:30	Check in	
09:30-12:00	LightTools Hands-on Workshop	<ul style="list-style-type: none">LightTools InterfaceBuild a Virtual Flashlight<ul style="list-style-type: none">Create a FlashlightSource ModelReceiver and SimulationOptimization
12:00-13:00	Break	
13:00-13:20	Check in	
13:20-15:50	CODE V Hands-on Workshop	<ul style="list-style-type: none">CODE V InterfaceInitial Design for Digital CameraPerformance EvaluationTolerance Analysis

Registration

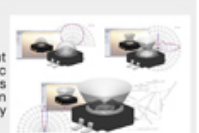

Please fill in the registration form here: <http://www.opssg.org> before 27-May-2016.

CODE V optical design software is used to model, analyze, optimize, and provide fabrication support for the development of optical systems for diverse applications. It provides a powerful and yet easy-to-use toolkit of optical techniques and calculations that enables you to create superior designs that will work right when built.

LightTools is a 3D optical engineering and design software product that supports virtual prototyping, simulation, optimization, and photorealistic renderings of illumination applications. Its unique design and analysis capabilities, combined with ease of use, support for rapid design iterations, and automatic system optimization, help to ensure the delivery of illumination designs according to specifications and schedule.
